

PikoFood Alk

PikoFood Alk, a non-foaming high-quality alkaline and chlorinated detergent for cleaning contaminated surfaces, materials and tools.

Benefits:

- **Due to sodium hypochlorite, PikoFood Alk knows a rapid disinfecting action**
- **Cleaning gets supported due to lime-binders**
- **Proteins, blood, and greases will be removed easily**
- **Extremely suitable for cleaning circulating systems**
- **Suitable for hard water**
- **Stainless steel, glass and plastics will not be affected.***

How to use:

- Rinse the surface/material/tools with clean, lukewarm water until all visible dirt is removed
- Let a 0,5% solution PikoFood Alk soak for 10-15 minutes**
- The temperature of the rinsing liquid should be 60°C at the beginning of the cleaning
- The final temperature should preferably be at least 40°C
- Always rinse with water of drinking water quality
