

PikoCare AnimalWash

PikoCare Animal Wash, a highly concentrated livestock shampoo on a natural basis which cleans your animals thoroughly and therefore reduces germ pressure.

Benefits:

- Cleans thoroughly on a base of natural soap
- Specially developed shampoo for washing pigs or cattle
- PikoCare Animal Wash is biologically degradable

The unique working propolis:

- Works antibacterial (kills bacteria and mould)
- Works antiviral
- Enhances the effect of antibiotics
- Slows the effects of infections (greasy pig disease, streptococcus, and staphylococcus)
- Stimulates blood flow
- Soothes pain and itching
- Improves the immune system

How to use:

- Dispense 2% PikoCare Animal Wash onto 100L of water
- In case of strongly contaminated livestock use a double dosage
- Can be used without dilution and in the right dosage
- Let PikoCare Animal Wash soak for 5 minutes
- Use a low pressure cleaner with water to hose down the PikoCare Animal Wash*

Dosage:

2% (In case of strongly contaminated livestock 4%)

Soaking time:

5 minutes

Storage:

Cool, dry

Pack size (kg):

10 | 20 | 200 | 1000

*Make sure that the udders of the cattle are rinsed thoroughly and that no dirt / product remains
