

PikoDes Para

A powerful disinfectant, specially developed for combating bacteria, yeasts, fungi and eggs of the large roundworm *Ascaris suum*. PikoDes Para contributes to optimal biosecurity within professional livestock farming.

- With PikoDes Para you have a product which optimally fights bacteria (excluding Mycobacteria and bacterial spores), yeasts and fungi on surfaces, materials, and tools in animal enclosures and the associated spaces
- PikoDes Para can be used perfectly against eggs of the big roundworm *Ascaris suum* on surfaces in empty pigsties and associated spaces

How to use:

- **First clean surfaces and materials which will be disinfected with a detergent (e.g. PikoClean Mousse LA sense)**
- **After cleaning: rinse the surface with water**
- **Spray (low pressure) PikoDes Para on the surfaces/materials which will be disinfected* (make sure no unprotected animals or people are present)**
- **Keep surfaces/materials which will be disinfected moist during the whole soaking time**
- **After the soaking time rinse the PikoDes Para thoroughly with water**

In case of disinfection of non-porous surfaces, materials and tools in animal residences and associated spaces

- To combat bacteria, yeasts and fungi

Protection to be used by: coverall, gloves, eye / face protection, respiratory protection (protection factor 4)

Dosage: 2,0% (Add 20ml PikoDes Para with water to 1l)

Soaking time: at least 30 minutes

In case of disinfection of pigsties and associated areas

To combat eggs of the big roundworm *Ascaris suum*

Protection to be used by: impermeable coverall, gloves, eye / face protection, respiratory protection (protection factor 4)

- The dosage to be used depends on the temperature and minimum contact time

At temperatures of 10° C:

- **Dosage:** 4,0% (Add 40ml PikoDes Para with water to 1l)
- **Soaking time:** at least 180 minutes
- **Dosage:** 6,0% (Add 60ml PikoDes Para with water to 1l)
- **Soaking time:** at least 120 minutes

At temperatures of 20° C:

- **Dosage:** 4,0% (Add 40ml PikoDes Para with water to 1l)
- **Soaking time:** at least 120 minutes

Pack sizes (kg): 10 | 20 | 200

Storage: cool, dry

Contains: Isopropanol, 3-Methyl-4-Chlorophenol, Phosphoric acid, Dodecylbenzenesulphonic acid, Propionic acid, chlorocresol
